

# ELECBRAKES PRODUCT MESSAGING

## ELECBRAKES: ONE SYSTEM. TOTAL CONTROL.

Elecbrakes delivers an all-in-one towing solution - a brake controller with built in automatic SwayControl. Proudly Australian made, Elecbrakes combines local innovation with rugged durability to handle the toughest conditions. Our game-changing SwayControl technology actively manages trailer sway, making towing safer than ever before. As Australia's leader in smart towing, we've fully integrated intelligent SwayControl into every EB2 and VM1 brake controller at no extra cost, delivering a world-first solution and setting the benchmark for what a brake controller should be — no matter what you're towing, what you're driving, or where you're going.

## ELECBRAKES EB2 TRAILER-MOUNTED BRAKE CONTROLLER

The EB2 Electric Brake Controller is designed for versatile towing, seamless performance, safety, and ease of use. Proudly Australian made, this trailer-mounted solution is suitable for all trailer types. It combines enhanced braking response, built-in SwayControl, and total system visibility for those who share their loads, tow with multiple vehicles, or want a quick and easy install.

### EB2 Key Product Features:

- **Built In SwayControl:** EB2 features automatic sway control technology, making your brake controller an all-in-one towing solution.
  - **Ultimate Towing Flexibility:** Whether it's switching between vehicles, sharing with friends, or managing rental fleets, EB2 offers the ultimate towing flexibility.
  - **Customisable User-Control:** Fine-tune your towing setup with highly definable brake settings. Adjust brake response, sway control sensitivity, and more.
  - **Plug & Play Installation:** DIY plug-and-play installation takes just 10 minutes, connecting your trailer to any vehicle.
  - **Advanced User Interface:** EB2 integrates easily with Apple CarPlay and Android Auto - a world-first. The Elecbrakes App also gives full braking visibility and diagnostics in real-time.
  - **Built Tough:** Built to handle Australia's harshest conditions: IP67-rated, shock proof, dust proof, & water proof. Australian made and tested, for Aussie roads.
-

## ELECBRAKES VM1 VEHICLE-MOUNTED BRAKE CONTROLLER

The VM1 Electric Brake Controller is designed for confident towing, delivering seamless performance, safety, and ease of use. Proudly Australian made, this vehicle-mounted solution is ideal for those who tow multiple trailers with a single vehicle. It combines enhanced braking response, built-in SwayControl, and total system visibility with a straightforward installation that integrates neatly into your vehicle.

### VM1 Key Product Features:

- **Built In SwayControl:** VM1 features automatic sway control technology, giving you customised sway protection for everything you tow, without costly trailer installations or modifications.
  - **Customisable User-Control:** Fine-tune your towing setup with highly definable brake settings. Adjust brake response, sway control sensitivity, and more.
  - **Easy Install, No Modifications:** The VM1 is easily installed with no dashboard drilling or in-car modifications required.
  - **Advanced User Interface:** VM1 integrates easily with Apple CarPlay and Android Auto - a world-first. The Elecbrakes App also gives full braking visibility and diagnostics in real-time.
  - **Built Tough:** Built to handle Australia's harshest conditions: IP67-rated, shock proof, dust proof, & water proof. Australian made and tested, for Aussie roads.
-

## ELECBRAKES SWAYCONTROL

No matter what you're towing, Elecbrakes SwayControl technology controls the risk of trailer sway, making towing safer than ever before. As Australia's leader in smart towing, we've fully integrated our intelligent SwayControl feature across the EB2 and VM1 brake controller range, delivering a world-first solution and setting the benchmark for what a brake controller should be.

Unlike mechanical devices or stand along sway control systems, Elecbrakes SwayControl is built directly into the EB2 and VM1 brake controllers, making it the only fully integrated, all-in-one solution that works with any vehicle, any trailer, and every towing setup. The single, smart system monitors your towing dynamics and delivers the exact response you need - whether that's precision braking, sway control or both.

With full system visibility through the Elecbrakes App and seamless Apple CarPlay and Android Auto integration, you can monitor performance, fine-tune settings, and even track your Trailer Stability Gauge to better understand your trailer's behaviour. And when the terrain calls for it, you can switch SwayControl off for complete manual control during off-road or 4WD adventures.

### **SwayControl Key Product Features:**

- **Adaptive Sway Detection:** Detects sway movement before you even feel it, monitoring your trailer's behaviour in real-time to stay one step ahead.
  - **Proportional Sway Control:** Matches brake intensity to sway intensity, applying just the right amount of braking to put you back in control.
  - **Custom Sensitivity Settings:** Adjust sensitivity levels to match your driving style, trailer setup, and road conditions for personalised protection.
  - **Full System Visibility:** Monitor stability and performance through the Elecbrakes App with live data and insights that help you tow smarter.
  - **Powered by One Brain:** Whether it's precision braking, sway control, or both, our single smart system delivers the exact response you need.
-

## ELECCONNECT™ ADAPTORS

The Elecbrakes elecConnect™ Adaptors makes connecting your Elecbrakes EB2 brake controller to your tow vehicle and trailer quick, simple, and reliable. Proudly Australian made, this adaptor offers a true plug-and-play design for installation in under 10 minutes with no in-vehicle modifications required. Featuring a high-quality, compact build that is dustproof, waterproof, and shockproof, the elecConnect™ adaptor is engineered to deliver seamless, dependable towing every trip.

### elecConnect™ Key Product Features:

- **Unmatched Durability:** Dustproof, waterproof, and shockproof for long-lasting performance.
  - **Simplified Installation:** Quick plug-and-play setup with no wiring or vehicle modifications.
  - **Adaptor Compatibility:** Designed for all 7-7, 7-12 and 12-12 flat pin towing setups.
  - **Compact, Streamlined Design:** Modern, low-profile construction for easy handling and neat integration.
  - **Australian-Made Quality:** Engineered and manufactured locally to meet strict safety standards.
  - **What's in the Box:** Includes a 1.2m elecConnect™ leader.
  - **Peace of Mind Towing:** Provides a secure, dependable link between vehicle, trailer, and brake controller for safer journeys.
